QUICK SPRING GEAR TIPS

Before you put away your sled, check the brake tips and bushing wear. Add a coat of penetrating oil to your sled (if it is wood) and sealant to wood runners. Check for frayed or chewed ganglines, replace this spring so there's no panic in the fall. Store all sleds flat, away from the sun and inside a building away from moisture.

We're off to see the Keeper, the wonderful Keeper of Treats

Fun Stuff

The first MMM Skijoring Clinic was held on January 11 in Missoula. Thanks to Nicki Arndt, Colette Whelan and Pam Beckstrom for presenting training tips for dogs, human training tips, equipment information and more. There were approximately 30 students and several have e-mailed telling us they are having a blast!

The filming of the movie "Klondike" which aired in January on Discovery Channel. It was a 3-part mini-series and Adanac Sleds and Equipment built the historically accurate sleds ... right down to the wooden brake and rusty bolts!
